Recommendation Letter

I am writing this letter to provide a strong professional reference for the Department for Experimental Medicine of the Medical University of Silesia in Katowice. I had the opportunity to work closely with the Department since 2016 and I can attest its exceptional professionalism and quality of work.

The Department for Experimental Medicine and its team led by Prof. Jaroslaw Barski have consistently demonstrated their expertise in the field of the animal surgery. Their attention to details and ability to deliver high quality service are commendable. They possess in-depth knowledge and skills that are evident in the successful completion of our courses and workshops. I was impressed by their strong work ethic while utilizing of the laboratory animals.

I highly recommend the Department for Experimental Medicine for any collaboration or partnership.

Rosmarie Frick, PhD
